- › Resources

Install – Docker

› Ubuntu 20.04 LTS Installation

› Prepare

- › `sudo apt-get remove docker docker-engine docker.io containerd runc`
- › `sudo apt-get update`
- › `sudo apt-get install apt-transport-https ca-certificates curl gnupg-agent software-properties-common`

› Setup Repository [recommended]

- › `curl -fsSL https://download.docker.com/linux/ubuntu/gpg | sudo apt-key add -`
- › `sudo apt-key fingerprint 0EBFCD88`
- › `sudo add-apt-repository "deb [arch=amd64] https://download.docker.com/linux/ubuntu $(lsb_release -cs) stable"`

› Install Docker Engine

- › `sudo apt-get update`
- › `sudo apt-get install docker-ce docker-ce-cli containerd.io`

› Add docker to give non-root user access

- › `sudo groupadd docker`
- › `sudo usermod -aG docker $USER`
- › Logout session or use command: `su -s ${USER}`
- › `docker run -d -p 80:80 docker/getting-started`

Install – Docker

- › Windows 10 64-bit Installation
- › **Supported Windows 10 64-bit Editions:**
 - › Pro, Enterprise, or Education (Build 16299 or later), can also be installed in Home Edition
- › **Hyper-V and Containers Windows features must be enabled.**
- › **Hardware prerequisites** are required to successfully run Client Hyper-V on Windows 10:
 - › 64 bit processor with Second Level Address Translation (SLAT)
 - › 4GB system RAM
 - › BIOS-level hardware virtualization support must be enabled in the BIOS settings.
- › **Download and execute setup:**
<https://hub.docker.com/editions/community/docker-ce-desktop-windows/>
